

Mohammad Khair Samir Jaradat

Data Analyst | AI & Data Science Graduate

mohammadlinkedin2004@gmail.com | +962 778 275 279 | Irbid, Jordan | linkedin.com/in/mohammed-khair-jaradat-a19707320 | github.com/MohLGNDQ2D

PROFESSIONAL SUMMARY

Fresh graduate in Data Science and Artificial Intelligence from Yarmouk University, skilled in SQL, Power BI, and Python (Pandas) across the full data workflow — from cleaning and exploratory analysis to dashboards and business insights. Also built hands-on AI experience, including Retrieval-Augmented Generation (RAG) and LLM-based systems, through a graduation project. Seeking a Data Analyst role, with growing interest in AI-supported analytics.

SKILLS

- **Data Analytics & BI:** SQL (MySQL, SQLite), Power BI, Tableau, Excel (PivotTables, KPI dashboards), Python (Pandas, NumPy), Git — data cleaning, aggregation, and exploratory analysis.
- **Applied AI (via graduation project):** Retrieval-Augmented Generation (RAG), vector databases (ChromaDB), text embeddings, BM25 retrieval, prompt engineering, LLM API integration, workflow orchestration (LangGraph), OCR (Tesseract), FastAPI, PostgreSQL.
- **Machine Learning Foundations:** Scikit-learn, classification, regression, and model evaluation metrics — built through NVIDIA Deep Learning coursework.

PROJECTS

Bayyan AI — RAG-Based Tax Advisory Chatbot (Graduation Project) Feb 2026 – Jun 2026

- Built a prototype chatbot that answers tax queries by retrieving and structuring data from local Arabic financial documents, with FastAPI and PostgreSQL handling the data layer.
- Combined BM25 keyword search with multilingual embeddings (ChromaDB) in a hybrid RAG pipeline to improve retrieval accuracy on Arabic text data.
- Orchestrated a multi-turn conversation workflow (LangGraph) with stateful memory and intent classification to route and process user queries.
- Used Tesseract OCR to convert scanned Arabic documents into structured text data, grounding LLM answers in domain-specific data while keeping tax calculations rule-based for accuracy.

E-Commerce Delivery Impact Analysis — Olist Dataset (Personal Project) Aug 2026

- Analyzed 96,353 orders in SQL (SQLite), joining orders, reviews, and customer tables to calculate delivery timing (JULIANDAY, CASE WHEN) and its effect on customer satisfaction.
- Cleaned and aggregated the data in Python (Pandas), finding a 7.99% delay rate and a 40% drop in average review score (4.29 → 2.57) for delayed vs. on-time shipments.
- Built a single-page Power BI dashboard presenting delivery KPIs and On-Time vs. Delayed comparisons as a clear, business-ready view of logistics and churn risk.

EXPERIENCE

Inventory Controller (One-Month Training) — Pella Pharma (Pharmaceutical Manufacturing) Jul 2026 – Aug 2026

Al-Hassan Industrial City, Irbid, Jordan

- Completed a one-month, hands-on training in inventory tracking and stock reconciliation within a regulated pharmaceutical manufacturing environment.

Software Engineering & Problem-Solving Trainee — 42 Irbid, Crown Prince Foundation Sep 2025 – Oct 2025

- Practiced programming logic, debugging, and root-cause analysis through daily peer-to-peer, project-based learning, building independent problem-solving skills under changing technical requirements.

EDUCATION

Bachelor of Science in Data Science and Artificial Intelligence — Yarmouk University Sep 2022 – Sep 2026

Irbid, Jordan — Fresh Graduate — Very Good

CERTIFICATIONS

- Data Analytics Essentials — Cisco Networking Academy (Aug 2026) | Fundamentals of Deep Learning — NVIDIA (Dec 2024)
- Generative AI: Prompt Engineering — IBM Developer Skills Network (Jan 2026) | Gemini Certified Student (University Tier), Google AI Competencies — Google for Education (Jun 2026)
- Boost Your Career with AI — Kiron Open Higher Education (Mar 2026) | Drive Your Success with Human Skills — Kiron Open Higher Education (May 2026)

LANGUAGES

Arabic: Native | English: Professional Working Proficiency
